

RSK is the fastest growing sidechain to build DeFi on Bitcoin

[Get to know the RSK Open Finance ecosystem](#)

Integrate with RSK and open up to the original, and largest addressable crypto market - Bitcoin

Bitcoin Total Addressable Market
Reach the largest addressable crypto market with RSK

Total Value Locked in RSK
Integrate RSK to access one of the fastest growing DeFi ecosystems

RSK is unique in its approach of securing its blockchain using the Bitcoin Network and opens up opportunities to engage and create wide-ranging Bitcoin powered DeFi applications.

Lower gas fees for users

Transacting on RSK is on average **40 to 50 times cheaper** for users when compared to the Ethereum network.

Benefit from RSK's EVM compatibility

Reach a wider user base while reducing dependency to any particular blockchain by seamlessly deploying compatible DApps in both **Ethereum and RSK**.

Increase the number of tx/s

RSK can support **10 transactions per second** on average, vs. 3.3 tx /s in bitcoin and 7 tx/ s in Ethereum.

Use the most secure blockchain for smart contracts in the world

RSK is secured by **40% - 60%** of Bitcoin hash power thanks to merged mining, making it the most secure of its kind.

Some of the dapps, wallets and exchanges in RSK's ecosystem

RSK was **the ideal platform to reach our goal** of creating a robust project with excellent performance that could empower bitcoiners to make the most out of their bitcoins. We had RSK's support throughout all the process and today **Money on Chain (MOC)** has a total value locked that surpasses **64 million dollars** with a historic performance that goes beyond 27% for Bpro.
- Mariana Sanguinetti, contributor at Money on Chain -

One of Sovryn's main goals is to provide bitcoiners with Defi tools so that they can leverage their bitcoin in a permissionless and censorship resistant way. A core part of our solution is the **incredible technology developed by the RSK team**, who are laser focused on creating the most secure smart contract platform. The RSK team are dedicated to extending the capabilities of Bitcoin and are natural partners for Sovryn.
- Elan Nahari, core contributor at Sovryn -

Leverage on RSK's resources

Increase your user base and foster adoption

Strategic Marketing

Social media

- Global following of **500k**.
- **2 million +** monthly impressions.
- Presence in **8** major languages.

Press coverage

SEO optimized paid press placements in leading industry outlets including Blockgeeks and CoinSpeaker.

Events

Feature at leading industry events alongside RSK, including **Consensus, Labitconf, Bitcoin2022**.

Investment and support

RSK Ecosystem

Connect with **dApps to Oracles** to **DeFi** marketplaces in our ecosystem.

Investment

Get access to **grants, bounties** and marketing fund to nurture projects that aim to improve the RSK ecosystem.

Technical support

Receive **premium support** from RSK experts for integration support, audits and improvements

About RSK

The RSK blockchain enables the execution of smart contracts that use Bitcoin as the native asset, **contributing to Bitcoin's value** as the leading global cryptocurrency and expanding its reach to all potential use cases of DApps.

RSK enhances Bitcoin in the following areas:

- Merged mined with **Bitcoin**.
- Turing-complete **RSK Virtual Machine (RVM)** for smart-contracts, EVM compatible.
- First confirmation of transactions in **thirty seconds** (vs 600 seconds in Bitcoin).
- **PowPeg** that ensures 1 BTC = 1 RBTC.
- **Protection from Selfish-mining** using the DECOR+ protocol.
