

RSK is the Number 1 blockchain to build DeFi for Bitcoin opportunities. Use RIF to enhance the DeFi experience, and engage with 3 million bitcoiners.

Get to know the RSK Open Finance ecosystem

rif Relay

Holding the native blockchain token for paying transaction fees creates friction for onboarding users into the DeFi ecosystem. In the ideal world, a project should choose a token as means of payment for transacting on the blockchain - adding an additional use case for their token of choice.

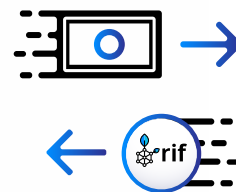

RIF Relay conquers this hurdle and blocker to mass adoption by allowing any ERC20 token to be used to pay for transaction fees!

Streamline transaction fees

Integrate **RIF Relay** to streamline the transaction fee process, allowing users to pay for transaction fees with the **any ERC20 token**.

Make new user onboarding easier

Give new users an opportunity to make their first transactions and familiarize themselves with the tools and services that are **integral to DeFi**.

Become a Relayer

Operators of the RIF relay servers who host the off-chain order books will **receive fees** paid out in RSK ecosystem tokens.

Open up to Bitcoin DeFi

RIF Relay is a unique feature of the RSK DeFi ecosystem - integrate Bitcoin DeFi through RSK for the most **user-friendly** experience.

“We all want to transfer money with the advantages of crypto but in a familiar and easy way. That’s why **Beexo** uses RIF Relay. An experience as simple as exchanging cash by hand, or sending a message with our Crypto Chat. It’s an easy, simple, and user friendly payment experience, without complications, to securely send money globally”
- **Ezequiel, Beexo Founder & CEO** -

Leverage on RIF /RSK resources

Increase your user base and foster adoption

Strategic Marketing

Social media

- Global following of **500k**.
- **2 million +** monthly impressions.
- Presence in **8** major languages.

Press coverage

SEO optimized paid press placements in leading industry outlets including Blockgeeks and CoinSpeaker.

Events

Feature at leading industry events alongside RSK, including **Consensus, Labitconf, Bitcoin2022**.

Investment and support

RSK Ecosystem

Connect with **dApps** to **Oracles** to **DeFi** marketplaces in our ecosystem.

Investment
