

# RSK is the Number 1 blockchain to build DeFi on Bitcoin opportunities

[Get to know the RSK Open Finance ecosystem](#)

Integrate Bitcoin DeFi to your wallet with RSK and open up to the original, largest addressable crypto market - Bitcoin

**Bitcoin Total Addressable Market**  
Reach the largest addressable crypto market with RSK

**Total Value Locked in RSK**  
Integrate RSK to access one of the fastest growing DeFi ecosystems

## Use the most secure blockchain for smart contracts in the world

RSK is secured by **40% - 60%** of Bitcoin hash power thanks to merged mining, making it the most secure of its kind.

## Benefit from RSK's EVM compatibility

Reach a wider user base while reducing dependency to any particular blockchain by seamlessly deploying compatible DApps in both **Ethereum and RSK**.

## Increase the number of tx/s

RSK can support **10 transactions per second** on average, vs. 3.3 tx/s in bitcoin and 7 tx/s in Ethereum.

## Lower gas fees for users

Transacting on RSK is on average **40 to 50 times cheaper** for users when compared to the Ethereum network.

## DeFi Protocols on RSK

"When we first integrated RSK, we had about **1,000 WAUs** using the wallet. Less than 8 months later, we have **12,000 WAUs**. That's 11x growth in 8 months, an average of nearly **140% growth** month over month, with most users coming from the RSK community."  
- Alex Min, Head of Marketing at Liquidity -

## Leverage on RSK's resources

Increase your user base and foster adoption

### Strategic Marketing

#### Social media

- Global following of **500k**.
- **2 million +** monthly impressions.
- Presence in **8** major languages.

#### Press coverage

**SEO optimized paid press placements** in leading industry outlets including Blockgeeks and CoinSpeaker.

#### Events

Feature at leading industry events alongside RSK, including **Consensus, Labitconf, Bitcoin2022**.

### Investment and support

#### RSK Ecosystem

Connect with **dApps to Oracles** to **DeFi** marketplaces in our ecosystem.

#### Investment

Get access to **grants, bounties** and marketing fund to nurture projects that aim to improve the RSK ecosystem.

#### Technical support

Receive **premium support** from RSK experts for integration support, audits and improvements

## About RSK

The RSK blockchain enables the execution of smart contracts that use Bitcoin as the native asset, **contributing to Bitcoin's value** as the leading global cryptocurrency and expanding its reach to all potential use cases of DApps.

### RSK enhances Bitcoin in the following areas:

- Merged mined with **Bitcoin**.
- Turing-complete **RSK Virtual Machine (RVM)** for smart-contracts, EVM compatible.
- First confirmation of transactions in **thirty seconds** (vs 600 seconds in Bitcoin).
- **PowPeg** that ensures 1 BTC = 1 RBTC.
- **Protection from Selfish-mining** using the DECOR+ protocol.
