

The RIF Marketplace Engine is a fully audited suite of SDK libraries and smart contract templates to help you get your NFTs on Bitcoin decentralized marketplace up and running in under two months.

NFTs have been the biggest blockchain trend of 2021. Use the RIF Marketplace toolkit to rapidly build an NFT Marketplace and reach the fastest growing audience in crypto.

40% US millennials say they're likely to buy NFTs.

NFTs/Collectibles Tokens Market Capitalization
NFTs Market Cap Grow 1,785% In 2021

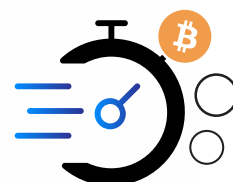

Build on Bitcoin

Use RSK smart contracts to build your marketplace on Bitcoin, the most secure and widely adopted blockchain in the world.

Reduce your time to market

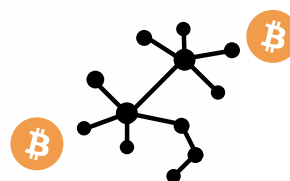

Use the RIF toolkit to quickly and easily build an EVM compatible NFT Marketplace within **2 months**.

Let RIF do the work

RIF Marketplace provides fully audited, open source SDK libraries so that you can **easily build a censorship resistant, permissionless NFT Marketplace**

Ready to expand services

Soon the RIF Marketplace will support the features needed for full **decentralized sharing economies**, including identity, reputation, and product listing with portable digital ID reputation .

"Leveraging a marketplace for NFTs on top of Bitcoin using RSK Infrastructure Framework builds an amazing storytelling for artists, collectors, art enthusiasts, and for the Bitcoin community. Even before the launch of the platform, we have attracted hundreds of talented digital artists willing to mint NFTs on Bitcoin." - **Carnaval Co-Founder Adrian Garelic** -

Leverage on RIF /RSK resources

Increase your user base and foster adoption
